Professional Summary

Senior Software Engineer with 15+ years building scalable, secure systems in healthcare IT, now focused on AI platforms: LLM applications, AI agents, and RAG. Experienced in .NET/C#, Python, Azure and AWS cloud-native architectures, Salesforce, and enterprise integrations across claims, enrollment, and contact-center platforms. Built AgentForge, an open-source AI agent platform with durable multi-agent runs, verified citations, and human review. M.S. in Computer Science, California State University, Dominguez Hills (2026).

Experience

Molina Healthcare, California —Senior Engineer

Sept 2024 - Present

- Delivered enterprise applications using .NET Core, Azure, Salesforce,Datalake,SQL, and Python in Agile environments.
- Designed **AI-based batch applications** using LLM APIs to audit contact-center conversations and generate agent performance scores.
- Built enterprise AI agents with Azure OpenAI, Azure AI Foundry, Semantic Kernel, and LangChain/LangGraph, integrated with Teams, SharePoint, and internal APIs (including Copilot Studio agents for document Q&A).
- Developed Azure POCs and integrated backend systems using **REST APIs and Informatica**. Mentored junior engineers and promoted engineering best practices.

BravoLT, Michigan —Senior Software Engineer

Client: Corewell Health

Mar 2021 - Sep 2024

- Built enterprise healthcare applications using .NET Core 6/8, Azure, SQL Server, Java, C++, and Informatica, including X12 EDI integrations (834, 837, 835, 270, 271).
- Developed AWS APIs (C#, API Gateway, Lambda, SQS, DynamoDB) for Facets member-enrollment workflows, with CI/CD (AWS CodeCommit) and Python IaC standardizing Dev, Test, and Prod.
- Led Salesforce development (Apex, Visualforce) integrated with Oracle

Skills

AI & Automation: LLMs & SLMs, Azure OpenAI, LangChain/ LangGraph, AI Agents, RAG, MCP, Copilot Studio, Ollama, FastAPI

Languages: Python, C#, .NET Core 6/8, ASP.NET Web API, Java, C++, Apex, TypeScript

Cloud & DevOps: Azure, AWS (Lambda, API Gateway, SQS, DynamoDB), CI/CD, IaC, Git, Jenkins, Azure DevOps

Databases: SQL Server, PostgreSQL (pgvector), Oracle, DynamoDB, MongoDB, Azure SQL

Healthcare & Integration: TriZetto Facets, X12 EDI (834/837/835/270/271), HL7, HIPAA, Informatica, IBM WTX

Web & Salesforce: React, Next.js, Angular, JavaScript, Salesforce (Apex, Visualforce)

Certifications

AWS:

- **AWS Certified Developer**
- **AWS Certified Solutions Architect – Associate Certified**

Microsoft:

- **AZ-900 Azure Fundamentals Certified**
- **Programming in C# (70-483) Microsoft Certified**

PL/SQL, and drove code quality through reviews and standards..

Cognizant US Corp, Iowa — Senior *Product Specialist*

Dec 2016 - Mar 2021

Client: Wellmark

- Led requirements and designs; built Facets claim-adjudication extensions (PRESAVE, PREPROC, POSTPROC, POSTSAVE) and tuned SQL Server procedures, triggers, and batch jobs.
- Delivered an ASP.NET benefit-configuration portal with Azure storage and NLP automation for benefit summary documents; initiated Salesforce development (Apex, Visualforce) and production support.

Cognizant India, Chennai— *Product Specialist (Contractor → Junior → Product Specialist)*

Oct 2010 - Dec 2016

Client: UHG & Wellmark

- Developed C# Facets extensions, SQL Server/Sybase components, and data-comparison and mapping tools; supported Facets upgrades and migrations.
- Designed X12 EDI maps (270, 271, 820, 824, 834, 835, 837, 997) with IBM WTX; led a team of 5 and automated job scheduling.

Projects

AgentForge: AI Agent Platform (Personal Project, 2026)
github.com/Kingslee1604/2026AIProjects

- Self-hosted platform (Python, FastAPI, PostgreSQL/pgvector, Next.js, Ollama, MCP) that answers security questionnaires from private documents with verified source quotes and human review.
- Durable multi-agent runs that survive crashes; row-level security; ~300 tests in CI; cut a 40-question run from 110 to 37 min.

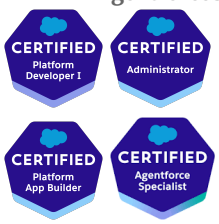

MEDREx: Cancer-Type Classification from Pathology Reports (M.S. Project, sponsored by Cedars-Sinai AI Campus, 2026)
kingslee1604.github.io/projects/medrex

Compared six NLP methods (TF-IDF + LR/SVM, fine-tuned Bio_ClinicalBERT, embedding k-NN, RAG with local and hosted LLMs) on 9,523 TCGA pathology reports across 32 cancer types.

TF-IDF + linear SVM reached 97.37% accuracy, beating the sponsor's 95.31% baseline and fine-tuned BERT (94.57%), and trains in 12 seconds on a CPU.

Salesforce:

- **Salesforce Platform Developer I Certified**
- **Salesforce Platform App Builder Certified**
- **Salesforce Administrator Certified**
- **AgentforceSpecialist**

HealthCare:

- Governance, Legal Issues, Medicare, and Medicaid (AHM 510) (External Certification)
- Professional Academy for Healthcare Management (AHM 250) (External Certification)

Facets:

- Trizetto Cert. Professional on Facets Technical Associate
- Trizetto Cert Professional on Facets Business Associate

Education

California State University, Dominguez Hills (CSUDH)

Master of Science in Computer Science

GPA: 3.87 / 4.00. Graduated: 2026

IFET College of Engineering (Anna University), India

Bachelor of Engineering, Electronics & Communication

2006 - 2010
